SUBJECT: LP Conversion Kit _ S1-1NP0347

This LP kit has been in use for several years, prior to the introduction of the TM9E, TM8Y, or TM9Y furnace models and as such the new furnace models are not included on either of the labels that are provided with this kit.

This letter is to advise you that the LP kit noted above will work on the TM9E, TM8Y, or TM9Y furnace models with the addition of the two new labels listed below.

Source 1 inventory

When current Source 1 inventory of LP Conversion Kit S1-1NP0347 is exhausted (within the next couple of months) the two labels in the new kits will be revised to include these additional furnace models. One label is for the outside of the carton and the conversion label is the one the dealer affixes to the furnace once the kit is installed.

Distributor inventory

Source 1 has obtained the two new labels and has them available for the kits you currently have in your inventory. The revised labels can be ordered from Source 1 for immediate needs to support TM9E, TM8Y, or TM9Y furnace installations. The labels will be provided at no-charge. See below for label part numbers.

Part Number	Description
S1-LB255417	Conversion Label
S1-LB255426	Conversion Label, Carton

We apologize for any inconvenience.
